UM ANNOUNCES SUMMER PROGRAM
IN MONTANA NATURAL HISTORY

brown/pas
4/27/79
state

MISSOULA--

The University of Montana College of Arts and Sciences has announced an innovative program in Montana Natural History for the 1979 Summer Session. This program has been designed to appeal to general education majors, teachers and lay people with a wide variety of educational backgrounds. Students and lay people will have an opportunity to study biological principles and become more familiar with the plants and animals of the Northern Rocky Mountains.

The program will offer four intensive one-credit weekend courses for students and non-students. Each session will be taught from 7 to 10 p.m. Friday and all day Saturday and Sunday. Most of the instruction will be outdoors. The titles and dates of these four courses are "Mushroom Foray" (June 22-24), "Birds and Mammals of the National Bison Range" (July 20-22), "Fish, Insects and Fishing in Western Waters" (July 27-29) and "Alpine Flowers of the Mountain West" (August 3-5).

In addition, traditional four-week courses will be open to non-students: "Ecosystem Biology" (3 credits, June 18-July 13) is an introductory ecology course stressing biological principles such as community structure, population processes and evolutionary adaptation. This class will meet Monday through Thursday, 9-11 a.m.

An "Ecosystem Biology Lab" will be offered four times, twice in each four-week session. These four labs will be "Grassland Ecology" (June 18-July 13, Friday 8 a.m.-1 p.m.); "Aquatic Insects" (June 18-July 13, Friday 1-6 p.m.); "Small Mammal Ecology" (July 16-August 10, Friday 8 a.m.-1 p.m.), and "Forest Vegetation" (July 16-August 10, Friday 1-6 p.m.).
